(57) **ABSTRACT**

An amusement ride is provided which includes a base, stationary elements mounted on said base, assemblies that are movable relative to said stationary elements, cabins that are fastened on said moving assemblies, and units for passengers loading, unloading and servicing that are mounted on said base. At least one of said cabins is designed as a restaurant and/or a bar, and said servicing units contain blocks for food preparation and/or storage. The amusement ride can be designed as a panoramic wheel or any other amusement device equipped with cabins that move under the action of forces applied.
